

**HIGHWAY  
ORIGINAL**

An **ACCURIDE**  
BRAND

# In-Frame Battery Box

Benefits Include:

- Clears frame rail space
- Allows for additional battery capacity for equipment such as APUs or auxiliary HVAC units
- Lightweight - doesn't add significant weight to the truck
- Serves as storage unit for backup power

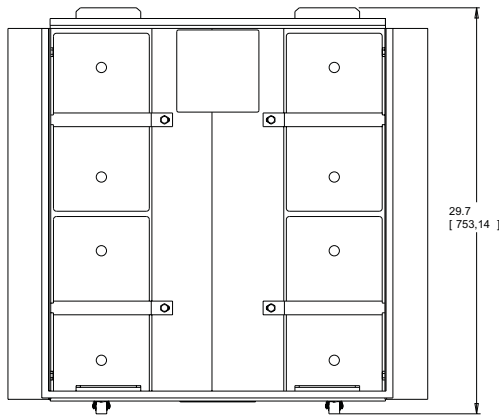

# In-Frame Battery Box

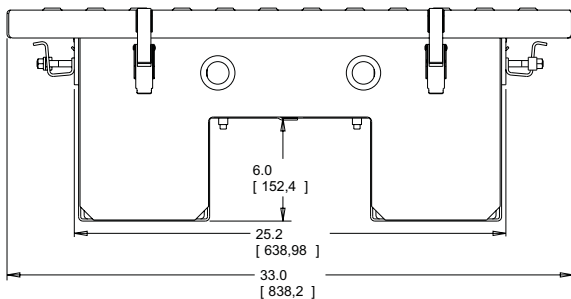

## Highway Original's all-makes in-frame battery box

As a leading supplier to the commercial vehicle industry, Highway Original is proud to offer an all-makes\* in-frame battery box manufactured to OEM standards. Enjoy all the features and benefits of a traditional battery box plus the added value of Highway Original's in-frame design.

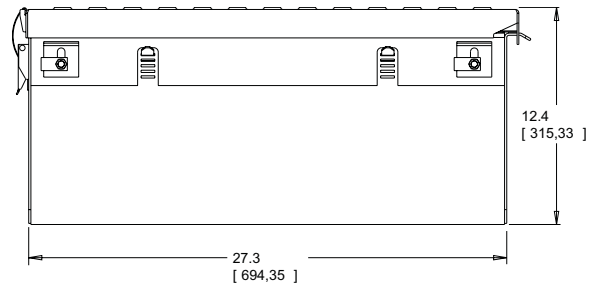

Features	Benefits
In-frame design	• Clears frame rail space
No frame rail drilling required - installation brackets included	• Installs in minutes
Holds up to four Group 31 batteries	• Serves as storage unit for backup power • Allows for additional battery capacity for equipment such as APUs or auxillary HVAC units
Constructed of high-strength 5052-H32 aluminum, <b>weighing only 55 lbs</b>	• Allows for easy handling and installation • Doesn't add significant weight to the truck
Removable lid serves as integrated deck plate	• Machined lid provides slip-resistant walking surface
